Idox plc

EIM Division signs \$4.08m Contract with large American Multinational Energy Corporation

Idox plc (AIM: IDOX), a leading supplier of specialist document management collaboration solutions and services to the UK public sector and highly regulated asset intensive industries, announces that its Engineering Information Management (EIM) Division has agreed to supply its McLaren Enterprise solution software suite and related services to an American multinational energy corporation. The contract, which includes the license, services and a multi-year managed, off-premise hosted solution, is worth \$4.08m over its duration.

The McLaren Enterprise solution software suite will be used to manage and optimise standard operating procedures (including safety) and engineering documentation and business processes for new capital projects and operations associated with upstream exploration and production.

Richard Kellett-Clarke, CEO of Idox, commented:

"This contract further consolidates McLaren's market leadership with the world's largest Oil & Gas companies, offering a "best in class" software solution to providers of asset intensive industries globally. With blue chip customers in unconventional gas, oil sands and offshore production, Idox's EIM Division has more than 20 years' experience helping its customers implement robust document control and management systems for both major capital projects and asset operations across the oil and gas industry."

About Idox plc

Idox plc is a supplier of specialist document management collaboration solutions and services to the public sector and increasingly to highly regulated asset intensive industries around the world in the wider corporate sector.

Its Public Sector Software Division is the leading applications provider to UK local government for core functions relating to land, people and property, such as its market leading planning systems and election management software. Over 90% of UK local authorities are now customers. The Division provides public sector organisations with tools to manage information and knowledge, documents, content, business processes and workflow as well as connecting directly with the citizen via the web. It also supplies, predominantly to the public sector in the UK and internationally, decision support content such as grants and planning policy information as well as related specialist services, including election management solutions.

The Engineering Information Management Division delivers engineering document control, project collaboration and facility management applications to many leading companies in industries such as oil & gas, architecture and construction, mining, utilities, pharmaceuticals and transportation in North America and around the world.

The Group employs over 570 staff located in the UK, the USA, Canada, Europe, India and Australia.
